Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The combination of the polyalkylene oxide with the multivalent cation and polyacid is seen as unobvious improvement over the closest prior art of record, Gombotz, U.S. Patent No. 5,942,253. Gombotz teaches a composition wherein the use of the polyalkylene oxide is independent of a multivalent cation and polyacid; moreover, the polyalkylene oxide is one of numerous bioadhesive polymers recited wherein there is no suggestion nor motivation to choose a polyalkylene oxide for combination with a multivalent cation and polyacid.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
